

# Our comprehensive Cancer Prevention Program includes Myriad myRisk® testing and is available for patients with a greater chance of developing breast, gynecologic, and other cancers due to family history.

The family history you provided suggests that you may be in a group of patients who could benefit from closer monitoring and more frequent screening due to an increased risk for a primary or second primary cancer.

Myriad's individualized TeleEducation Program, an enhancement to the myRisk hereditary cancer test, allows you to speak to a patient educator, a board-certified genetic counselor, about the Myriad myRisk Test. This program is available to you at no additional charge. Your doctor has indicated that you are appropriate for the myRisk hereditary cancer test and collected your sample.

To complete your test, please perform the following steps within 24 hours of your appointment. If this is a Friday, please perform these steps today or by 1PM the following Monday. Patient Education hours are

## INSTRUCTIONS

STEP  
1

Watch the education video found in one of the below places:  
<https://mysupport360.com/resources/educational-videos/>  
Text CRA to 99150 or use the QR code to the left.

STEP  
2
